

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the Specification.

Listing of Claims:

1. (Currently amended) A digital broadcasting system, comprising:
a transmitting means having:
a means for producing data broadcasts,
a first transmitting system for generating a digital broadcast, the digital broadcast including an digital audio/video broadcast and ~~[[a]]the~~ data broadcast,
a second transmitting system for constructing the digital broadcast received from the first transmitting system such that the digital broadcast can be served on the Internet; ~~and a data broadcast provided by the means for producing a data broadcast~~
and
a unit for registering ~~[[both]]~~ the constructed digital broadcast ~~and the constructed data broadcast~~ on an Internet site.
2. (Previously presented) The digital broadcasting system according to claim 1, wherein the data broadcast is produced based on a Markup or JAVA® programming language.
3. (Canceled)
4. (Canceled)
5. (Currently amended) The digital broadcasting system according to claim 1, wherein the Internet site stores the ~~digital~~ audio/video broadcast or the data broadcast continuously produced.
6. (Canceled)

7. (Canceled)

8. (Currently amended) A method for operating a digital broadcast at a transmitting unit of a digital broadcast system, the method comprising:

producing a data broadcast;

generating ~~[[the]]~~a digital broadcast ~~by using~~ including the data broadcast and an ~~digital~~ audio/visual broadcast;

constructing the digital broadcast such that the digital broadcast can be served on the Internet; and

~~registering both the data broadcast, and the digital broadcast on an Internet site.~~

9. (Previously presented) The method according to claim 8, wherein the Internet site provides a viewer with a dedicated browser.

10. (Currently amended) The method according to claim 8, wherein the Internet site stores the ~~digital~~ audio/video broadcast or the data broadcast continuously produced.

11. (Currently amended) The method according to claim 8, further comprising converting the generated ~~digital~~ audio/visual broadcast and the produced data broadcast into an Internet-supporting format, if the generated ~~digital~~ audio/visual broadcast and the produced data broadcast are not in the Internet-supporting format.

12. (Currently amended) A method for operating a digital broadcast at an Internet terminal of a digital broadcasting system, the method comprising:

connecting to an Internet site providing ~~both a data broadcast and a digital~~ broadcast, the digital broadcast including an ~~digital~~ audio/video broadcast and a data broadcast;

selecting a broadcast from at least the audio/video broadcast or the data ~~broadcast or the digital broadcast or both;~~ and

downloading and displaying the selected broadcast,
wherein the digital broadcast is constructed from the audio/video broadcast and the data broadcast in a transmitter such that the digital broadcast can be served on the Internet.

13. (Canceled)

14. (Previously presented) The method according to claim 12, wherein one of a dedicated browser provided from the Internet site or a browser embedded in the Internet terminal is used to connect to the Internet site.

15. (Previously presented) The method according to claim 12, wherein the provided data broadcast includes a linked Internet site.

16. (Currently amended) The method according to claim 12, wherein both the ~~digital~~ audio/video broadcast and the data broadcast are selected.

17. (Currently amended) A method for operating a digital broadcasting system, the method comprising the steps of:

registering ~~at least one~~ a digital broadcast including an digital audio/visual broadcast and ~~at least one~~ a data broadcast on an Internet site which can be served on the Internet;

connecting to the Internet site to select a broadcast from the ~~at least one digital~~ audio/visual broadcast and the ~~at least one~~ data broadcast; and

downloading and displaying the selected broadcast,
wherein the digital broadcast is constructed from the audio/video broadcast and the data broadcast in a transmitter such that the digital broadcast can be served on the Internet.

18. (Canceled)

19. (Currently amended) The method according to claim 17, wherein the Internet site has a plurality of ~~digital~~ audio/visual broadcasts or data broadcasts continuously stored.

20. (Previously presented) The method according to claim 17, wherein the at least one data broadcast has a linked Internet site.

21. (Currently amended) The digital broadcasting system according to claim 1 further comprising an Internet terminal for connecting to the Internet site to receive the ~~digital~~ audio/video broadcast or the data broadcast.

22. (Previously presented) The digital broadcasting system according to claim 21, wherein the Internet terminal connects to the internet site via a browser.

23. (Previously presented) The digital broadcasting system according to claim 22, wherein the browser is a browser embedded in the Internet terminal or a browser provided from the Internet site.

24. (Previously presented) The digital broadcasting system according to claim 21, wherein the Internet terminal is a PDA, a mobile terminal, a computer or a home electric appliance with an Internet function.

25. (Currently amended) The method according to claim 8, wherein the data broadcast or the ~~digital~~ audio/visual broadcast is provided upon a viewer's request.

26. (Previously presented) The method according to claim 14, further comprising downloading and installing the dedicated browser, if the dedicated browser exists in the Internet site.

27. (New) The method according to claim 1, wherein the digital broadcast includes a past digital broadcast and a present digital broadcast.

28. (New) The method according to claim 17, wherein the digital broadcast includes a past digital broadcast and a present digital broadcast.
